## SUMMARY

I'm a mid-level creative developer based in Buenos Aires, Argentina.

At the age of 29, I have a rather unusual life story to account for. I left home at 18, to serve in the Israeli Air Force for 3 years. Meanwhile, I was working nights mixing drinks in the busy Tel Aviv scene. South Africa was my home for 5 months. Other ventures include several positions across the Middle Eastern and European wine industry. Eventually, I've settled into the web/multimedia development field, which has been an interest for me since early age.

I'm enthusiastic about researching emerging technologies, confidently handling online communities and web services. Proactive and up to date on design and cultural trends.

Currently looking to evolve in the creative technological realm, my greatest professional aspiration is to grow in a place where I can contribute my diverse skills and experiences.

## EXPERIENCE

### **Creative Ads Support Specialist, Google DoubleClick Platforms, Cognizant Technology Solutions Argentina**

Buenos Aires — February 2015 to present

The Creative Ads Support team troubleshoots and resolves technical issues related to DoubleClick Studio and Google Web Designer (GWD). They provide support to global Studio advertiser and agency clients, and to Googler teams with questions about building HTML5 creatives in GWD.

#### Scope of Work

- Troubleshooting client-submitted reactive support tickets on creatives built in Google Web Designer or DoubleClick Studio
- Troubleshooting reactive support tickets submitted by Account Managers on behalf of their clients regarding creatives built in Google Web Designer or DoubleClick Studio
